

SEVEN MORE MIDDIES ARE MADE DEFENDANTS

Additional Cadets Named Increases
Number in "Cribbing" Scandal
to Twenty-Three.

ANNAPOLIS, Md., June 28.—Seven additional midshipmen were today made defendants of interested parties before the court of inquiry which is investigating the "cribbing" scandal at the Naval Academy, increasing the number to twenty-three. They are David Glick, E. H. James, W. H. Hopkins, Jr.; E. J. Waddell, C. M. Reagle and Karl Keller of the present second class, and H. R. Whitaker of the third class. All were made defendants upon the basis of testimony given during the latter part of last week. Their entry into the case as interested parties is expected to prolong the hearing. The opening of the court today saw the beginning of the defense, the government for the time being having discontinued the calling of witnesses.

J. L. Kenworthy First Witness.

The first witness called by the defense was J. L. Kenworthy, a classmate and the roommate of Midshipman Wessell, one of the original seven defendants. He testified to his own "thorough belief" and that of his class, in the honor of Wessell and the other first class men involved in the case. He said that if Wessell had told him "dope" prior to the Spanish examination he didn't pass it to him (Kenworthy). He said the other defendants had been in the hospital, owing to a foot ball injury, and of his need for "dope" to help him through the Spanish examination. Asked if midshipmen in the hospital were not kept in touch with their lessons, he said this was usually done, but that Wessell had told him the lessons he received while in the hospital came in very irregular form.

TRAVEL INCREASES RISK OF CATCHING TYPHOID

Curing of Chronic Carriers of Disease Most Necessary, Surgeon General Rucker Says.

SAN FRANCISCO, June 28.—"The epidemiology of typhoid fever has passed from the realm of speculation into that of fact," said Assistant Surgeon General W. C. Rucker of the United States public health service in a conference before the American Academy of Medicine here today. "Typhoid fever is not a place disease," said Dr. Rucker, "unless the term be used to designate that place in which there is careless disposal of human filth. Typhoid is not confined to any section or any season, and whoever travels to any very great extent multiplies his contact with the source of infection."

Dr. Rucker spoke on "The Transmission of Typhoid Fever," and Dr. J. H. Stumbo, of the address being of particular interest because of the recent consideration of the interstate quarantine regulations by act in conference held in Washington between the surgeon general of the United States public health service and the state and territorial health authorities. "If there were some way in which chronic typhoid carriers could be eradicated from the state," he said, "a great forward step would have been taken toward the eradication of the disease. The state does not yet in possession of knowledge as to the means of accomplishing this. The great and lasting result which is to be sought is the incalculable loss of the public mind. It is true that a certain amount of good has been accomplished by the instruction of the adult layman, but the public health propaganda which is now being actively pushed by federal, state and municipal governments cannot hope to achieve full results until the present generation of little children has become men and women."

AUTO PLUNGE INTO CANAL IS CAUSE OF TWO DEATHS

Accident Near Turners Falls, Mass.,
Fatal to Mr. and Mrs.
Robert D. Miller.

TURNERS FALLS, Mass., June 28.—An automobile in which Mr. and Mrs. Robert D. Miller were returning to their home in Athol plunged into a canal here today. Mr. Miller was drowned and Mrs. Miller, who was rescued from the water by her son, W. W. Miller, principal of the high school at Maynard, Mass., later died of shock. The younger Miller and Miss Edna Locke of Winchester, Mass., who were also in the car, were not injured. The machine operated by Miss Locke, crossing the bridge over the canal, when the accident occurred. Considerable construction work is in process at this point and the guard rail of the bridge was missing. In the darkness of early morning the automobile shot over the side of the bridge into the water.

DELAYS ROCK ISLAND LOAN.

Samuel Untermyer Opposes Issuance
of Receiver's Certificates.

CHICAGO, June 28.—Samuel Untermyer of New York, representing interests in the Chicago, Rock Island and Pacific Railroad Company antagonistic to the Reid-Moore contract, appeared in the federal court before Judge Carter today, and for the moment opposed the application of the receivers for a court order for the issuance of \$2,500,000 receivers' certificates with which to pay interest due the next month. Action was deferred until Mr. Untermyer, with the receivers, H. C. Mudge and Jacob M. Dickinson, would appear to pass examinations, but to grow up. The forms of our pleasure seeking disordered what we really are. Work is important, but it is only one of the important things. It is always the spirit that plays. Education must tell us not only how to live, but also how to spend most profitably and joyously the hours that remain.

New Members for Board of Trade.

At a meeting of the executive committee of the Board of Trade today new members were elected as follows: Martin D. McQuade, J. W. Babson, George F. Sack, George E. Potter, Philip Walker, J. R. Simpson, Jr.; William W. Dudley, E. L. Stock, Charles F. Diggs, Henry L. Quinn, William B. Turpin, Henry Lattimer, Harry H. Bailey, George F. Hunt, M. A. Purcell, Howard W. Phillips.

Fakers and Crooks!

The advertising columns of The Star are edited as carefully as the news columns. Fakers and crooks are barred. Every advertisement known to contain an untrue or misleading statement has been rejected. Every reader is asked to be on the vigilance committee and help police the columns.

COMMITTEE IN CHARGE OF MEMORIAL SERVICES

Commander Lake of Army and Navy
Union Announces Those for
Maine Monument.

National Commander H. Oden Lake of the Army and Navy Union, S. A., announced today as a tentative committee to have charge of future memorial services at the monument to the dead of the battleship Maine at Arlington the following memorial committee: National Commander Lake, chairman; Col. William H. Roach, Col. O. C. Hauschild, Robert F. Finucane and Judge Advocate General Lemuel Fugitt. He stated that a supplementary committee of the Department of the District of Columbia will be named later by Col. John McElroy, department commander.

Wants Badges Restored.

Commander Lake has requested that the badges of the Army and Navy Union be restored to the members of the crew of the battleship Maine in the wreck was raised to the monument, but to remain on exhibition with other relics of the Maine in the corridors of the War Department, with a descriptive card attached to them.

In a personal conference between Secretary Daniels and the national commander these matters were given favorable consideration. Commander Lake stated that the Secretary of the Navy is an active member of the Army and Navy Union, while Mrs. Daniels, who was recently presented with a gold badge, is the first woman honorary member of the Army and Navy Union.

MINERAL FOOD NEEDED, SAYS HOMEOPATHIST

Tells American Institute Convention
That Human Cancer Is
Due to Its Lack.

CHICAGO, June 28.—Physicians from all sections of the country are attending the meeting of the American Institute of Homeopathy, the recognized charter-governing body of that school of healing. The convention is to continue through Friday, and seven bureaus and four affiliated societies will confer in connection with those of the main organization. Extraneous of a parasite or fungus growth is a cause of cancer, according to the opinion of Dr. Horace Packard of Boston University, who discussed "The Cancer Question" before the Surgical and Gynecological Society here today. Dr. Packard emphasized his belief that the possible cause of cancer is dietary and argued that demineralized foods form a factor in the disease's development. The human family is underfed in mineral food salts, he said.

"A momentous fact," he added, "is that the four mills and the rice mills of the civilized world are but a part of a great world of iron, phosphorus, sodium, potassium, silica, calcium, chlorine, magnesium and sulphur (mineral salts) from which the food supply and sending out food material rich in heat units but pitifully meager in energizing and immunizing food salts so mainly to feed domestic animals."

Need of Play.

Recreation has become a matter of public concern, said Dr. Anson Cameron of Chicago, contending in an address today that "in the past the attitude toward recreation in America has been that of the Puritan, to whom joy is danger." Dr. Cameron was speaking before the bureau of pedology of the institute, discussing the "Effect of Play on Mental Development and Education."

"The fear that the love of play will interfere with the love of work and so undermine character is groundless," he said. "Play develops organic vitality, nervous energy and will, and interests specific attention and enthusiasm to the work. It is less effective. It lacks enthusiasm and develops only in a negative way when the child does things foreign to its nature. In obedience to commands from an adult. Such lack of activity depresses vitality. Modern psychology teaches that joy is power, that right recreation is not merely wholesome but developmental. Modern education, stimulated by recent profound social changes, is experiencing a period of restlessness, discontent and experimentation. Several new types of school are being tried; one is the play school, in which the teacher's interest is centered in the children and their activities and not merely in subjects of study. Another new type is the vacation school, which recognizes that the child's education is going on every day."

Needs of Children.

"Then we have also the open-air school for the anemic and tubercular child, but the mass of children are kept indoors and are subjected to a string of diseases. To obtain the best educational advantages a child must be blind, deaf, feeble-minded or incurable. Then he is given exercises, playgrounds, gymnasiums, baths, fresh air in abundance, gardens and other things. Normal children must get along the best they can without them. The real business of the child is to pass examinations, but to grow up. The forms of our pleasure seeking disordered what we really are. Work is important, but it is only one of the important things. It is always the spirit that plays. Education must tell us not only how to live, but also how to spend most profitably and joyously the hours that remain."

GERMANY BLAMES SERBIA.

Says Protection of Austrian Heir's
Assassins Caused World War.

BERLIN, June 28, by wireless to Sayville, N. Y.—Among the news items prepared by the Overseas News Agency for distribution today was the following: "The German press reminds the world on the anniversary of the assassination of Archduke Franz Ferdinand, a heir to the Austrian throne, and his wife, at Sarajevo, that Serbia's protection of the assassins precipitated the world war, that fact having been almost obliterated by the rapid subsequent developments."

Howard May Not Play For Month.

CHICAGO, June 28.—Ivan Howard, first baseman of the St. Louis Americans, who was spiked by Weaver in yesterday's game here, was found today so seriously injured that it was decided to send him back to St. Louis. It was said he would probably not play for a month.

AUSTRIAN HEIR KILLED ONE YEAR AGO TODAY

War Between Eleven Nations Resulting
Has Caused Loss of
6,000,000 Men.

One year ago today the Austrian Archduke Francis Ferdinand and his wife were shot and killed in the little Bosnian town of Serajevo by Garvino Princip. It was the act of Princip, a poor student, which ultimately resulted in eleven nations going to war. The nations are, on one hand, Great Britain, France, Russia, Serbia, Japan, Belgium, Italy and Montenegro, and, on the other, Germany, Austria and Turkey. The war to date, according to conservative estimates compiled from the best available reports, has caused the loss to the various belligerents of more than 6,000,000 men, dead, wounded and prisoners, and more than five hundred ships. Of these about 120 were war vessels.

The outstanding results on land are these: The greater portion of Belgium is under the control of Germany. Many a city has been driven from the far east.

A part of the Dardanelles is in the possession of the allied troops. Portions of France and Russia are in the possession of German troops. A strip of Alsace has been taken from Germany.

On the continent of Africa parts of territorial possessions have been lost by both sides. Various island possessions of Germany have been taken by the forces of the allies. Italian troops are in possession of a strip of Austrian territory.

The Results at Sea.

The outstanding results at sea are these: German and Austrian mercantile shipping has been driven from all the open seas.

German and Austrian war vessels having a total displacement of approximately 257,000 tons have been destroyed.

War vessels of the allied nations having a total displacement of approximately 192,000 tons have been sent to the bottom.

The greater portions of the German and allied fleets in the North sea remain intact.

Except for communication through Holland and the Scandinavian nations, Germany is cut off from the rest of the world.

Efforts on the part of the Germans to place the British Isles in a similar predicament has resulted in the sinking by submarines of hundreds of vessels flying the flags of the allied and neutral nations.

The sinking in this manner of the Cunard liner Lusitania with the loss of more than one hundred American lives precipitated a request upon the part of the United States that such practices, in so far as they might menace Americans, be stopped.

MONTEREY IS SUPPLIED WITH FOOD, SAYS OFFICIAL

Fiat Money Makes Living Cost High,
Declares U. S. Consul General Hanna.

MONTEREY, Mexico, June 24, via Laredo, Tex., June 28.—Food shortage in this part of Mexico is apparently a condition of the past, a remedy for which has been found in the opening of transportation to interior Mexico. Travelers en route south from the border now are able to secure a plentiful supply. At the principal stations between Nuevo Laredo and Monterey, Rodriguez, Lampazos and Villahermosa, chickens, mules, corn and wheat cakes are offered for sale by hawkers, who meet all trains.

Along the line to Monterey are seen many fields of native corn, while the hillsides are alive with herds of goats. In Monterey the market places are filled with every sort of food and meat. Figured on a gold basis, everything is much cheaper than in the United States, but figured on a constitutional money basis and considering that \$2 constitutes 16 cents gold, but is a day's wage, living expenses are high for the poor.

Mr. Hanna's Relief Acts.

American Consul General Hanna is supplying Red Cross corn to fully 12,000 persons, distribution of relief being made tri-weekly. In speaking of the food question in Monterey, Consul General Hanna said: "During the winter I found it necessary for the sake of humanity to provide food for approximately 1,000 persons in Monterey in obedience to the majority of instances these people were widows of ex-army officers of the various factions. At the time I had a small fund on hand, the residue of previous Red Cross relief. This I utilized. Later we made application to the organization for funds. The European exigency made the securing of money impossible. I was compelled, for humanity's sake, to have recourse to my private funds. I am proud to say that by the middle of July all relief for general relief will have passed."

SWEDISH QUEEN AVERS SYMPATHY WITH GERMANY

Is Given a Great Ovation at Berlin
While on Way Home From a
Visit at Karlsruhe.

BERLIN, June 28 (by wireless to Sayville, N. Y.).—The Overseas News Agency today gave out the following item: "Queen Victoria of Sweden, while returning from a visit to her mother, the grand duchess of Baden, at Karlsruhe, stayed over for a day in Berlin and was shown conspicuous attention by the German emperors and other members of the royal family."

"On her arrival at the capital the queen was given a great ovation by a thousand Berlin students who wished to manifest their sympathy at the miraculous escape of her majesty when the royal palace was attacked by French aviators."

"The queen joined in the singing of 'Deutschland Ueber Alles' and on receiving the leaders of a torchlight procession, said: 'My sympathy is with Germany. You may announce this to the whole world.'"

Lyle Andrews Removed at Nashville

NASHVILLE, Tenn., June 28.—The city commission of Nashville this morning adopted a resolution, the purpose of which was the removal of Lyle Andrews, commissioner of finance, against whom charges of removing city books have been lodged. Park Marshall, former clerk and master here, was named commissioner of finance.

But the man with a scheme is not looking out for your interest; it's your principal he is after.

SONS OF TEUTONS DEFER ADDRESS BY MR. BRYAN

Chicago Organization Objects to
Repetition of Speech on Peace
Delivered in New York.

CHICAGO, June 28.—A meeting of the Sons of Teutons, which was to have been held here tonight, with William Jennings Bryan as one of the speakers, has been postponed, according to an announcement today by G. F. Hummel, chairman of the committee on arrangements. As originally planned, Mr. Bryan, who today was on his way to Lincoln, Neb., was to pause here and address the meeting. The former Secretary of State yet may address the Sons of Teutons, "if satisfactory arrangements can be made," Mr. Hummel said.

"The subject on which Mr. Bryan was to talk was really a minor matter," said Mr. Hummel. "We wanted him to talk on the exportation of ammunition, and he offered to repeat his New York address on 'Peace.' That talk would do us no good. Stop the exportation of munitions of war and there would be peace in a month."

Will Speak in San Francisco.

SAN FRANCISCO, June 28.—William Jennings Bryan, former Secretary of State, has accepted an invitation to deliver an address at a mass meeting to be arranged by the American Independence Union here for July 8. It was announced today, Mr. Bryan will also be the orator at a Fourth of July celebration next Monday. The American Independence Union seeks to present fairly the German view of proper American neutrality.

NEW AUTO CHAMPION.

DARIO RESTA. The winner of Chicago's first auto derby. In the fastest 300-mile automobile race ever recorded he drove his French car to victory at the new Speedway Park.

About 100,000 persons saw the Italian reel of the distance at an average rate of 97.6 miles an hour. His time was 3 hours 7 minutes and 27 seconds.

In winning the race Resta broke all world's automobile records for driving the leaders of the race. His total winnings for the day's drive were \$24,300.

BASE BALL AGAIN IN COURT.

CHICAGO, June 28.—For the first time since the anti-trust suit against organized base ball was heard last winter base ball took a place in the courts here today when attorneys for the Federal League asked Judge Landis of the federal court to dissolve the injunction restraining Armand Marsans, former Cincinnati outfielder, from playing with the St. Louis Federals. Judge Landis said he would hear arguments in the case this afternoon.

The injunction against Marsans was entered June 23, 1914.

Woodward & Lothrop

New York—WASHINGTON—Paris.

All the Women's Suits That Sold Up to \$35 Are Now Being Closed Out at the Low Price of \$14.75
